Currently Head of AI at Cello Limited, previously Senior DevOps Engineer at Kordia Ltd. Spent 5 years as IT Manager leading systems engineering, turnkey on-prem infrastructure builds, large-scale render farms for LG and SoftBank, for a 90 person video photogrammetry startup. Built and provisioned bare-metal render farms using Ansible and MaaS while managing infrastructure across Wellington, Seoul, and Tokyo.

Background spans a 50/50 split of technical and creative experience, including on-set production and post-VFX/Compositing (audio and post for film, music, and commercial projects in NYC and Nashville). Some Cybersecurity studies

SKILLS

AI Solutions: Customised end to end turnkey AI Harness and Eval stacks
DevOps: Premised & Cloud DevOps, Ansible Automation, Linux Server Admin, Bare Metal Deployments (MaaS/Cloud-init), Virtualization & Hypervisors, Containers, CI/CD
Creative: AI Workflows & Platforms, Photogrammetry, Digital Art, Photography, Blockchain Use Cases

STUDIES

Automation, Cybersecurity, Ansible, Containers, PowerCli, Stack Development, Networking, Github Actions
